

A. BOM

A.1 Cookies

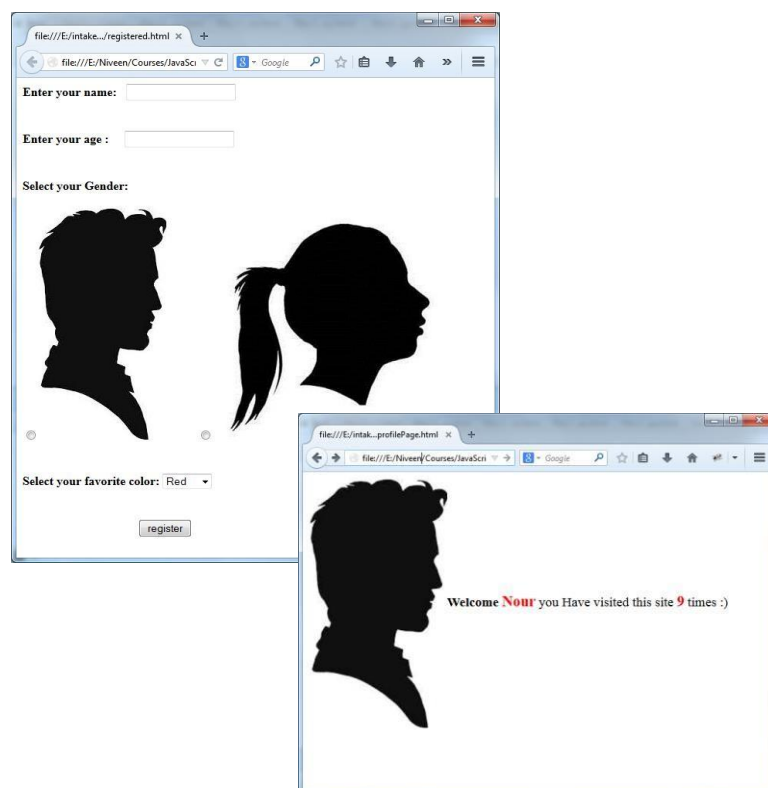

Make your own .js library to create, display and delete cookies, then use it in creating the required cookies to display a greeting message to your visitor with displaying an image as his profile pic referring to his gender, and inform him with his number of visits to the site. Display user name and number of visits with font color according to his choices. Replace the registration page with the profile page using location object

the library should have the following functions:

- **getCookie(cookieName):**
 - Retrieves a cookie value based on a cookie name.
- **setCookie(cookieName,cookieValue[,expiryDate]):**
 - Sets a cookie based on a cookie name, cookie value, and expiration date.
- **deleteCookie(cookieName):**
 - Deletes a cookie based on a cookie name.
- **allCookieList():**
 - returns a list of all stored cookies
- **hasCookie(cookieName):**
 - Check whether a cookie exists or not

Note:

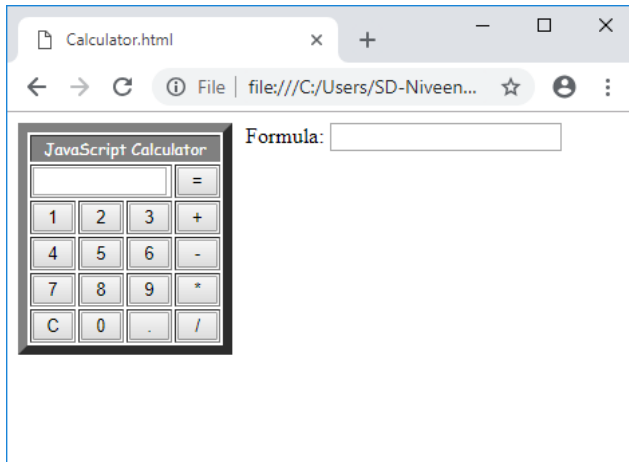

Don't use <form> tag

B.DOM

B.1 Simple Calculator.

Implement the required functions in an external file to let calculator.html works properly

B.2 Photo gallery with Next, Previous and Slideshow.

- Next goes to next pic and stops when reaching last image
- Previous goes back to previous image and stops whenreaching first image
- Slideshow will circulate, i.e. when reach last image issshould continue displaying staring from first image Stop will stop slideshow behavior.
- Let the delay between every to image lasts 2 seconds
